Program

State of the Map Asia 2018 features two full days of talks, workshops, an opening and closing keynote. We have an exciting two days! The program is created by curating proposals from you - the community and through a scoring process by the committee.

The conference will be at the Indian Institude of Management campus in Bengaluru. Much of the program will be between two auditoriums. We also have plenty of space set aside for breakout sessions and birds of a feather meetups.

Register now!

Saturday, November 17
